* 1abef5a (HEAD -> HimasNLP, origin/HimasNLP) Add data preprocessing pipeline, Bow feature extraction, and Logistic Regression + LSTM models
* 456f76d Add data preprocessing pipeline, Bow feature extraction, and Logistic Regression + LSTM models
* 5aa5876 Merge pull request #5 from Ilmaan-Ahamed/main
```

Contribution Summary

- Data preprocessing utilities (src/data_utils.py) and shared text cleaning functions (src/text_cleaning.py)
- Bag-of-Words feature extraction pipeline
- Logistic Regression model implementation, training, and evaluation
- LSTM model implementation (Embedding → LSTM → Dense) and evaluation
- Train/test split generation script

Contribution Summary

- TF-IDF feature extraction pipeline
- Random Forest model implementation, training, evaluation, and feature importance analysis
- RNN model implementation
- Re-ran training and updated results after the CNN → RNN architecture change

Contribution Summary

- Dataset exploration and quality analysis
- BERT WordPiece tokenization and [CLS]-embedding extraction pipeline
- SVM model trained on BERT embeddings, with full evaluation metrics
- Fine-tuned bert-base-uncased classifier via HuggingFace Trainer
- Streamlit web application (src/app.py)
- bert based function updated
- Upload the Screen shots
